Problem Statement

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · Covers: Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · Folder: assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
An “About Me” section.
An “Education” section listing your academic history in a semantic list or table.
A “Skills” section.
A “Contact” section with a real <a href="mailto:..."> link and at least one social/portfolio link.
Correct use of semantic HTML5 elements throughout — <header>, <nav>, <main>, <section>, <article>, <footer>
Styling entirely in a separate styles.css file (external stylesheet, not inline style="" attributes) using t
Deliverables in assignment-1/: index.html, styles.css, any images, and your completion PDF.
