Lab 2 — Responsive Navbar and Grid Drill

Task statement
Lab 2 — Responsive Navbar and Grid Drill
Difficulty: Easy–Medium · Covers: Lectures 7–10 · Folder: lab-2/
A focused, smaller-scale rehearsal for Assignment 2: build just a responsive navbar (logo left, links center, cart icon right, collapsing into a hamburger menu below 768px) and a 4-column-desktop / 2column-tablet / 1-column-phone product grid, using Flexbox or Grid plus Bootstrap or Tailwind.
Content can be placeholder text/images — the point is the responsive mechanics, not the final design.
Deliverables in lab-2/: index.html, your CSS/framework files, and your completion PDF (with screenshots at phone/tablet/desktop widths).

Implementation: Tailwind CSS with locally compiled utilities. Run npm ci and npm run build:css to rebuild. Navigation uses a checkbox and CSS; no runtime JavaScript is required.

index.html — 375px
